

QUALITY POLICY PTH "MATT"

The company's mission is build a strong and permanent position in the national market and a significant position on the foreign market in the basic sectors of the company.

Since its foundation, MATT tried to gain a leadership position in their field. That was the the 80's, when the company introduced on the Polish market joysticks own construction known for reliability and high quality. The same aims are now, when the company entered the ranks of producers of elements for cable television.

Maintaining the position among the leaders in the industry requires continuous tracking of trends and market demands, using the latest technology in the production process and at the design stage; this also requires the use of the latest measuring equipment and supporting construction the work of modern software. All of these conditions of building and maintain a strong position company require careful supervision and respect appropriate procedures.

Implementation of Quality Management System ISO 9001 and its continuous improvement ensures the propriety and effectiveness of these actions. This system also supports the PTH MATT proper customer service and its orders, supports the development and introduction into production of new, innovative products meet customer expectations and high demands of industry standards and guidelines.

The fact involvement of all employees in the process of continuous improvement of Quality Management System, monitoring of the production process at every stage and continue the good tradition of maintaining friendly and partner relationships with cooperators, based on compliance with ethical and legal rules of doing business is the best guarantee of a positive image of the company as a competent partner. This picture of the company complemented by a modern and reliable products should provide the company a strong position among the leaders in sector manufacturers of component of cable television.

I personally keep watch over the proper development of the company, help me with this dedicated staff, its development is also an important part of their development.
